Warnings (UV light)

- While in operation UV LEDs emit intense but mainly invisible ultraviolet radiation, which may be harmful to eyes, even for brief periods.
- Do not look directly into the UV LED during operation.
- Be sure that you and everyone in the vicinity wear safety goggles that provide suitable UV protection when operating a UV LED.
- Please follow all standard procedures for storing, handling, cleaning, mounting, soldering, disposing, or otherwise handling LED dies or packaged LEDs, including static electricity protection.
- The user has the responsibility to inform, train and instruct, customers and employees of the dangers to eye safety.
- UV LEDs are ESD sensitive (Class1). Handling and use of UV LEDs must be compatible with the ESD sensitivity rating.
