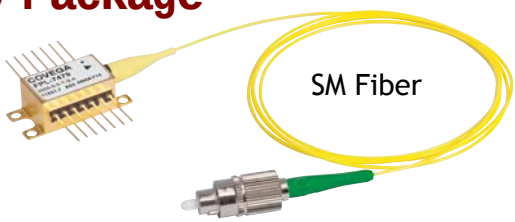
2000 nm Fabry-Perot Laser Butterfly Package



FPL2000S

Description

The FPL2000 series laser is a high power Fabry-Perot Laser diode (FPL) based on state-of-the-art, quantum-well epitaxial layer growth and reliable ridge waveguide structure.

The FPL2000S is housed in a standard, 14-pin butterfly package with an integrated thermoelectric cooler and thermistor. The output fiber is newly developed 2000 nm single-mode fiber with a larger optical core and significantly lower bend-loss sensitivity compared to SMF-28 fiber. SMF-28 is available as an option for applications requiring compatibility.
